### **ROAD & RAIL SERVICES EARNS TWO PRESTIGIOUS AWARDS FROM HONDA.**

LOUISVILLE, KY — Road & Rail Services, Inc., a leading provider of rail-related services in North America, was recently honored with two awards from American Honda Motor Corporation (AHM) of North America. The first of two awards, both presented to Road & Rail Services' President Kevin Brandon at AMH's annual award celebration in Torrance, CA, was the prestigious "Processor of the Year Performance Excellence Award for 2014". This award recognizes the auto-processor who best meets AHM's Safety & Quality performance standards at their North American operations. The second award is the newly implemented "Superior Quality for 2014", which recognizes the automotive processor that scores the highest on AHM's stringent quality audits and has the lowest damage to Honda vehicles. Road & Rail Services' Marysville, Ohio Team was awarded in recognition of outstanding Safety, Quality, Processing Performance and Service for 2014. Mr. Brandon stated that "the Marysville Team as well as the entire Company is honored to be recognized twice by Honda for safety, performance excellence and for the quality that everyone strives to provide our customers on a daily basis".

"We're truly honored to have our team at the points of origin recognized for their superior quality and performance by Honda," noted Tom Gerstle, CEO of Road & Rail Services and one of the company's founders. "We see it as further proof of our commitment to delivering the very best service in our industry, day in and day out. We're very fortunate to have teams in the field with the experience, knowledge and dedication to quality that are necessary to earn this kind of recognition."

Established in 1987, Road & Rail Services is a recognized industry leader and a top-tier provider of rail related services to railroads, to rail shippers, and to railcar owners. With a reputation for excellence, the Company provides service solutions with competencies in train operations (railcar switching and shortline operations), in maintenance operations (rolling stock, infrastructure, and track assets), and product handling. Road & Rail Services has operations in 18 states and has a significant impact on the North American rail network, as recognized by numerous industry awards. The Company enhances operating velocity and asset condition within the automotive, aggregate, coal / utility, intermodal, paper, and steel / metals industries.
