Road & Rail Services Earns Honda's 2017 Plant Processor of the Year and Process Quality Awards.

LOUISVILLE, KY — Road & Rail Services, Inc., a Louisville, Kentucky-based leading provider of rail and automotive services in North America, was recently recognized by American Honda Motor Co., Inc. as the 2017 Plant Processor of the Year for performance excellence at its site in Marysville, Ohio. This marks the third time the company has earned this prestigious award in the last four years. In addition, Road & Rail Services received Honda's 2017 Process Quality Award. Honda operates 19 major manufacturing facilities in North America producing a wide range of Honda and Acura automobiles, automobile engines and transmissions, Honda all-terrain vehicles, power equipment products and more.

In presenting the Plant Processor of the Year award, Honda recognized Road & Rail Services for its "Outstanding Processing, Quality and Service," and cited the company's "Outstanding Vehicle Handling Process" in presenting its Process Quality Award. Road & Rail Services Vice President of Customer Service Robert Sadler noted, "It's truly an honor to be recognized by Honda with these awards, because we invest considerable time and talent in monitoring and continuously improving our process to provide the highest level of service possible. This kind of recognition is only possible through the dedication and hard work of our team of professionals at Marysville and all our sites across the country. They truly put 'performance in motion' every day."

Established in 1987, Road & Rail Services is a recognized industry leader and a top-tier provider of rail related services to railroads, rail shippers, and railcar owners. With a reputation for excellence, Road & Rail Services provides service solutions with competencies in train operations (railcar switching and shortline operations), in maintenance operations (rolling stock, infrastructure, and track assets), and product handling (in areas such as automotive origin plant operations and destination terminal operations, intermodal, and bulk commodities). Road & Rail Services has operations in 18 states and has a significant impact on the North American rail network, as recognized by numerous industry awards. Road & Rail Services enhances operating velocity and asset condition within the automotive, aggregate, coal / utility, intermodal, paper, and steel / metals industries.
